Restriction Requirement

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to a running board, classified in class 280, subclass 163.
 - II. Claim 19, drawn to an injection molding method, classified in class 425, subclass 542.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make a materially different product, such as a reinforced case, container or structural beam or rib, and the product, as claimed can be made by a materially different process, such as casting.
3. Because these inventions are distinct for the reasons given above and
 - (a) have acquired a separate status in the art as shown by their different classification,
 - (b) the search required for Group I is not required for Group II, and
 - (c) have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
